

## CAPABILITIES STATEMENT

8834 Goodby's Executive Dr, Suite 1  
Jacksonville, FL 32217

### Corporate Overview

TriageLogic is a URAC-accredited, physician-led provider of high-quality nurse telehealth services and Remote Patient Monitoring (RPM). Our company is founded by doctors. Ravi Raheja, MD directly supervises our clinical and nonclinical staff to ensure the highest and most consistent quality of care. Ravi also supervises the development of new products lines to increase ease of access to care. Charu Raheja, PhD works with our data analysis team to identify trends and update processes to improve patient outcomes over time. We use our innovative medical communication solutions and expertise to improve patient outcomes, expand access to care, and decrease healthcare expenses.

### Core Competencies

**Nurse Triage on Call:** A nationwide, URAC-accredited nurse telehealth call center used by doctors' offices, hospitals, and organizations. 75% of all calls can be handled by a nurse without a doctor consult.

**Remote Patient Monitoring:** Clinical and non-clinical staff track vitals from health-monitoring wearables to remotely evaluate chronically ill patients. Nurses are able to detect deteriorating health and intervene before the patient presents a symptom, saving lives and healthcare dollars.

**Mobile Application:** Allows patients to message nurses for call backs, prescription refills, appointments, and after-hours care.
