Remote Patient Monitoring

Remote Patient Monitoring (RPM) with 24/7 care improves the care of chronically ill patients while increasing your revenue. A comprehensive solution for peace of mind for you and your patients.

- Daily review of results
- Daily outreach to patients with non-critical alerts
- 24/7 outreach by RNs for critical alerts as defined by providers
- 24/7 hotline to answer patient questions and triage
- Nurse time billable to insurance

Does your office have the time and resources to monitor multiple dashboards for multiple patients?

We can assist you!

Our Team

- A Medical Director oversees your program and ensures high patient care
- Our registered nurses have an average of 10 years of experience with acute patient care
- Our services meet Medicare and HIPAA requirements
- Around the clock help for questions included

Our Software

- State-of-the-art software provides you with analytics and detailed reports on patient care
- Standard and custom protocols for the device and disease
- SOC 2 Certification

While Remote Patient Monitoring can improve health outcomes for those with chronic diseases, it can also burden your physician's time. We alleviate that burden by doing the monitoring for them.

- Ravi Raheja, MD
MEDICAL DIRECTOR
