Nurse Triage Protocols

MyTriageChecklist adds triage protocols to your existing patient management system

Looking to manage and document patient calls using your EMR system? Add triage protocols without buying a whole new system. This module will convert an EMR into a clinical triage platform for 24/7 usage with Schmitt-Thompson protocols.

3 EASY STEPS TO PROVIDE HIGH QUALITY PATIENT CARE

Step 1

Patient calls in. Nurse enters symptom "keywords" to quickly access the correct protocol.

Step 2

Nurse uses protocol checklist to ask all the right questions and direct the patient to the appropriate level of care.

Step 3

The system documents all the call details as the nurse handles the call.

- Up-and-running in less than 30 minutes
- Get patients to the right place at the right time
- Standardize and document every patient phone call
- Works with any paper-based or EMR system
- Fast and efficient interface

- Point and click documentation
- Email/text handouts and care advice
- Smart copy and paste to EMR
- Medication dosage chart
- Override disposition
- Custom provider preferences*
- Reports and analytics*

*Extra charges may apply

Training Assist

We believe continuous learning is essential for maintaining the highest level of patient care. Training Assist uses advanced simulation technology to provide a safe and engaging environment for nurses to hone their skills, practice new techniques, and learn from real-life scenarios.

History Assist

Accurate patient history is crucial in making informed decisions. History Assist supports nurses in gathering and documenting patient information more efficiently, allowing them to spend more time on patient care and less on administrative tasks.

Protocol Assist

We take pride in our partnership with Barton Schmitt and David Thompson's Clinical Content, seamlessly integrating their reputable content into our innovative triage software. If you're using EPIC or another triage protocol system, inquire how we can collaborate with your existing setup.

Quality Assist

Quality Assurance is an essential aspect of nursing care. Quality Assist evaluates the expected protocol and disposition made during every call, comparing them to the selected protocol and disposition utilization. This gives the QA team more comprehensive data, helping to identify improvement areas and celebrating success.

Founded in 2005, TriageLogic is URAC accredited physician-led provider of high-quality telephone nurse triage services, triage education, and software for telephone medicine. TriageLogic serves over 22,000 physicians and covers over 40 million lives nationwide.
